WCN 2013 XXI World Congress of Neurology

Country: Austria	Date: 09/21/2013
<p>WCN 2013 XXI World Congress of Neurology</p> <p>September 21-26, 2013 Vienna, Austria</p> <p>Join leading neurologists at WCN 2013, the world's biggest neurology event. The XXI World Congress of Neurology will feature a rich scientific programme, including the latest developments in clinical practice and research, distinguished plenary speakers, teaching courses, workshops, and lectures, all on the increasingly global aspect of our work.</p> <p>List of Proposed Topics</p> <p>Epilepsy (Joint WFN & ILAE)</p> <p>Movement Disorders</p> <p>Stroke (Joint WSO & WFN)</p> <p>Neuro-critical care</p> <p>Dementia</p> <p>MS & Demyelinating Diseases</p> <p>Neuromuscular disorders</p> <p>Headache</p> <p>Pain</p> <p>Neurorehabilitation</p> <p>Neurooncology</p> <p>CNS infection</p> <p>Vestigo and balance disorders</p> <p>Sleep</p> <p>Leukoencephalopathies & Child neurology</p> <p>Autoimmune encephalitis</p> <p>Neurology, Health economics & outcomes</p> <p>Metabolic and mitochondrial diseases</p> <p>Neuroepidemiology</p> <p>Environment, Climate Change</p> <p>Autonomic nervous system</p> <p>Neuroepithalmology</p> <p>Brain & Behavior</p> <p>Motor neuron disease</p> <p>Channelpathies</p> <p>Palliative care</p> <p>Nutritional disorders & Neurotoxins</p> <p>Stem cells in Neurology: hopes, uses and abuses</p> <p>Neurological surgery for the neurologist</p> <p>Psychiatry for the neurologist</p> <p>Neuroethics</p> <p>Interventional Neuroradiology</p> <p>Advances in Neuromaging</p> <p>Advances in Neurophysiology</p> <p>Therapeutic Neurotoxins</p> <p>Biomarkers</p> <p>World History of Neurology</p> <p>You Tube neurology</p> <p>Movies and neurology</p> <p>Sports neurology</p> <p>Training in neurology around the world</p> <p>WHO Neurology Initiatives (Noncommunicable disease Initiative, MHGAP Program, ICD-11 revision of neurology codes)</p> <p>Cases from around the world</p> <p>Making the Case for Neurology</p> <p>Contact Us</p> <p>Please email us at wcn@kenes.com for more information or any queries.</p>	
<p>Original Announcement: http://www2.kenes.com/wcn/Pages/Home.aspx</p> <p>Categories: Autoimmune Diseases, Bioethics, Biomarkers, Brain, Brain Disorders, Case Reports, Cerebrovascular Disease, Chronic Diseases, Clinical Research, Continuing Medical Education, Dementia, Diagnostic Research, E-Health, Environmental Health, Environmental Sciences, Epidemiological Studies, Epilepsy, Headache, Health Economics, History of Medicine, Medical Ethics, Medical Humanities, Motor Neuron Diseases, Movement Disorders, Multiple Sclerosis, Neuro-Imaging, Neurology, Neuromuscular, Neurophysiology, Neurosurgery, Nutrition, Oncology, Ophthalmology, Outcomes Research, Pain, Palliative Care, Physical Rehabilitation, Psychiatry, Sleep, Sports Medicine, Stroke, Toxicology, Webinars/Meet</p>	
<p>Audience: Neurologist, Physician, Physiotherapist, Researcher</p> <p>Send to a colleague or bookmark it:    </p> <p> Download this item as a PDF</p>	
<p>Concepts in Contemporary Cardiovascular Medicine Symposium 2012</p>	
Country: United States	Date: 05/01/2012
State: Texas	
<p>Concepts in Contemporary Cardiovascular Medicine Symposium 2012</p> <p>May 1-3, 2012 Houston, Texas</p> <p>Join a powerful faculty from leading cardiovascular medical centers who will provide you with cutting-edge and in-depth strategies that you can take home and immediately put into practice. Hosted by Memorial Hermann Heart & Vascular Institute and the UT Health Science Center at San Antonio, two centers of excellence in cardiac care, highlights of this interactive, hands-on symposium include sessions on structural heart disease, TAVR, emerging interventional therapies for acute stroke, as well as developments in antiplatelet and antithrombotic therapy, a half-day STEMI symposium and simulator training.</p> <p>Featured Content</p>	

Newest technologies to treat structural heart disease
Developing a multidisciplinary valve team for optimal management of patients with aortic stenosis and mitral regurgitation
Pericardaneous approaches to mitral and aortic valve disease and atrial septal defects
New concepts for optimal STEMI management
Emerging interventional therapies for acute stroke
Carotid interventions for cerebrovascular disease
New developments in antiplatelet and antithrombotic therapy

Special Features

Half-day STEMI Symposium
Spotlight on transcatheter aortic valve replacement (TAVR)
Simulation lab training
Live and taped cases with renowned faculty
Hands-on, new technology workshops
Alumni case presentations
Interactive audience discussions
Nursing education sessions

Complete Conference Management
11440 N. Kendall Drive, Suite 306
Miami, FL 33178

13th Research Centers in Minority Institutions (RCMI) International Symposium on Health Disparities

Country: United States Minor Outlying Islands **Date:** 12/10/2012

13th Research Centers in Minority Institutions (RCMI) International Symposium on Health Disparities

On behalf of the Research Centers in Minority Institutions (RCMI) Program at Morehouse School of Medicine and the Division of Research Infrastructure of the National Center for Research Resources, we are pleased to invite you to attend and participate in the 13th RCMI International Symposium on Health Disparities to convene December 10-13, 2012 in San Juan, Puerto Rico. Pre-Symposium Training workshops will take place December 8-9.

This four-day symposium has been designed to offer opportunities for sharing research information in areas related to cardiovascular disease, diabetes and obesity, cancer, women's health, mental health, infectious diseases, stroke, and behavioral and community health. The program will highlight RCMI program institutions, partners, and collaborators. We invite others who are engaged in clinical, basic science, education and policy research in health disparities to join us. This collaborative effort, expected to draw 550-600 participants, is sponsored by the National Center for Research Resources (NCRR) Division of Research Infrastructure, managed by Morehouse School of Medicine, and hosted by the RCMI Programs at the Ponce School of Medicine, Universidad Central Del Caribe, and University of Puerto Rico Medical Sciences Campus.

8th World Stroke Congress

Country: Brazil **Date:** 10/10/2012

8th World Stroke Congress

October 10-13, 2012 Brasilia, Brazil

The 8th World Stroke Congress will be held in Brasilia October 10 to 13, 2012. This is the first time that the World Stroke Congress is held in Latin America.

The scope of the World Stroke Congress is broader than international stroke conferences: besides first class presentations on research findings, overviews of current state of the art, lectures of leading experts and teaching courses there will also be a strong focus on parts of the stroke care like primary prevention, organization of services and rehabilitation. Global issues will be much addressed including global burden of stroke, specific features of stroke in low to middle income countries and priority settings when resources are low. A substantial part of the programme will focus on nursing and multidisciplinary networking. Another substantial part is directed to stroke support organizations.

Possible Topics

1. Acute Stroke Management
2. Acute Reperfusion Treatment
3. Acute Stroke: new treatments concepts
4. Acute Neuroimaging
5. Neurocritical Management
6. Hemorrhage – Intraparenchymal
7. Aneurysm and Vascular Malformations
8. Venous diseases
9. TIA and minor Stroke
10. Cerebrovascular Occlusive Disease
11. Heart and Brain
12. Infectious Diseases and Stroke
13. Vascular Cognitive Impairment/Vascular Dementia
14. Uncommon Stroke Disorders
15. Experimental and Translational Neuroscience
16. Genetics
17. Epidemiology of stroke
18. Pediatric Stroke
19. Preventive Stroke Strategies
20. Diagnosis
21. Large Clinical Trials
22. On-going Clinical Trials
23. Outcomes and Quality of Care
24. Stroke Care Settings
25. Multidisciplinary Clinical Rehabilitation
26. Public Awareness/Advocacy
27. Nursing

World Stroke Congress Secretariat

2nd International Association of Science and Technology for Development (IASTED) International Symposia on Imaging and Signal Processing in Health Care and Technology (ISPHIT 2012)

Country: United States
State: Maryland

Date: 05/14/2012

2nd International Association of Science and Technology for Development (IASTED) International Symposia on Imaging and Signal Processing in Health Care and Technology (ISPHIT 2012)

May 14 - 16, 2012 Baltimore, Maryland

In recent years, with the aid of engineering and information technology, image and signal processing has emerged as a high-tech field, generating innovation in such areas as medical imaging, health information sciences and remote sensors, watermarking, PACS, MRI, nuclear medicine and medical cybernetics. Scientists and engineers in this field have recently been working towards advanced issues as developing virtual learning systems for training intravenous catheterization and collecting blood samples, creating artificial organs that mimic natural human organs, conducting telemedicine and teleradiology, performing surgeries with robots, creating a laboratory-on-a-chip, and watermarking medical data.

Purpose

This conference will be an international forum for researchers and practitioners to exchange the latest research, results, and ideas in the areas of imaging and signal processing in healthcare and technology.

Scope

The topics of interest to be covered by ISPHT 2012 include, but are not limited to:

SYMPOSIUM 1: IMAGING AND SIGNAL PROCESSING
Biomedical Signal Processing
Biometrics
Biophotonics
Computational Biology and Biological Networks
Computed Tomography
Data Representation and Visualization
Fuzzy Logic and Expert Systems
Haptics
Healthcare Informatics
Human-Computer Interaction
Image Ontology
Integrated Medical Image Analysis
Magnetic Resonance Imaging (MRI)
Medical and Health Informatics
Medical Communication Technologies
Medical Cybernetics
Medical Data Compression
Medical Data Storage
Medical Image Processing
Medical Sensors
Medical Signal Processing
Microscopy
Mobile Computing
Nuclear Medicine
Optical Imaging
Picture Archiving and Communication System (PACS)
Radiology and Radiography
Signal Processing of Physiological Signals
Software Languages and Tools for Imaging
Ultrasound Imaging
Watermarking and Cryptography
Wireless Medical Communications
Wireless Sensor Networks

SYMPOSIUM 2: TELEHEALTH AND ASSISTIVE TECHNOLOGY
Adaptive Telecommunication Systems
Assistive Ergonomic Technology
Assistive Medical Technology
Assistive Rehabilitative Technology
Assistive Robotics
Assistive Software Technology
Bioelectric Sensors
Braille Displays
Cognitive Retraining
Ergonomic Furniture
Geriatric Care
Head-Mounted Displays
Intelligent Tutoring Systems
Mind Reading/Mapping Software
Pedestrian Mobility Aids
Pervasive Healthcare
Prosthetics
Rehabilitation Engineering
Screen Readers
Smart Homes
Speech Synthesis
Stroke Rehabilitation
Surgery Simulations
Tactile Graphics
Tele-home Healthcare and Telemedicine
Telemedicine Systems
Telemetry
Telerobotics
Telerobotics and Telematics
Teletext
Traffic Telematics
Ubiquitous Computing
Vital Signs Monitoring
Voice Recognition Software
Wearable Devices
Web-based Telehealth
Concurrent Conferences
ISPHT 2012 will be held in conjunction with the IASTED International Conferences on: Human-Computer Interaction (HCI 2012)
