### CHROME PASSWORD DECRYPTOR – UTILITY TO RECOVER CHROME STORED PASSWORDS

 March 10th, 2012  Mourad Ben Lakhoua

Google chrome is now widely used for navigating online resources, chrome as any web browser allows to store passwords to help users automate their online authentication, this is good as a functionality but from the security prospective this enable hacker to get all stored passwords. Chrome Password Decryptor is a free application that you can [...]

### NEW RELEASE OF JOHN THE RIPPER PASSWORD CRACKER

 June 4th, 2011  Mourad Ben Lakhoua

New version of John The Ripper has been released, John the Ripper is a free password cracking software tool. Initially developed for the UNIX operating system, it currently runs on fifteen different platforms (11 architecture-specific flavors of Unix, DOS, Win32, BeOS, and OpenVMS). It is one of the most popular password testing/breaking programs as it [...]
