### Casino Fun

August 15, 2011 :: Posted by - admin :: Category - What's New

Today we decided to have a piece of fun and we have chosen a set of YouTube movies devoted to online casinos. The bunch includes both casino jokes and online casinos promo videos. To our regret, we expected to find more creative and interesting pieces of video, but we must admit that there's much to be desired in this field. So, below are the cartoons and videos related to online casino. If you are looking for a serious play, skip this post and visit **Roxy Palace Flash Casino**.

The 1st one is called: Not all blondes are dumb!

The second one is a song from a Lil' Cino 2010 debut CD.

And the 3rd one is a hilarious Winstar online casino commercial, the best one and very funny!

Stay with us and let yor casino play be a pleasure and a fun!

### Incredible Payouts at Dragon 777

August 02, 2011 :: Posted by - admin :: Category - What's New

Online casino Dragon 777 has announced that the payout percentage in poker games in June was more than 100%. The results have been checked by an independent institution, so no chance of a mistake exists.

Nowadays Dragon 777 remains one of the most rapidly-developing fresh online casinos on the net. This Europe-oriented online casino is available in English, German and French and accepts all major currencies. The design of the casino is based on eastern (Chinese) leitmotifs and is plain, modern and stylish. Both download and flash version are available. All new players are given a 200% match bonus on their first deposit and 77 free spins on the slot Kathmandu.

To start with, you can try to play casino slots or other casino games. The main games sections are:

1. Table games
2. Poker games
3. Slots games
4. Unique games

The list of the unique games includes more than 50 games, among which there are Pharaoh's Gems, Mayan Bingo, Premier Trotting and others. You have to register to try to play any of them online. No-download version flash version seems to be a bit slow, so I advice to install the software on your PC or mobile phone if you want to play at this online casino.
